

Quality management system and document control

plan-box.com has developed a project space specially adapted for the aviation industry in collaboration with aviation maintenance companies (Hedinger MRO):

The big advantages:

- ✓ We lay the foundation
- ✓ You benefit of maximum design freedom to manage and install your settings.
- ✓ Simple creation of new accounts
- ✓ Easy set up of release loops
- ✓ Simply upload and download documents or view them online from your home office or on the road

Employee Qualification

Release loops

External access FOCA

Manuals with QR-Code validation

Store all employee qualifications with a date tracker

All employee training documents and certificates are stored in the project room.

Traceability, i.e. ensuring and checking that employees have the latest training courses (Human Factor / Safety Management System)..

Allow external access e.g. for the Federal Office of Civil Aviation FOCA

The FOCA auditor has access to the project room with reader rights and can prepare accordingly. (Full control of what he can and cannot see). No more exchange of data by e-mail.

Control of manuals

The latest version of each manual (Applicable Data) is available in the project room and is provided with a QR code. The manual can be viewed directly online at any time and no longer needs to be downloaded or printed out. This ensures that the latest valid version of the manual is being used and can be traced. The QR code can be scanned with any smartphone and provides the corresponding indication of whether the printed manual is still up to date. A function that is highly valued by the FOCA.

Customized release loops

Our customers can set and adapt their own release loops easily. (Engineering-Quality-Postholder-Accountable Manger, etc.) The documents in the project room, once released, represent always the latest revision. If a person wants to add a new version, the project room automatically creates a new revision number. Meanwhile, all printed versions with a QR code become invalid.

Quality management system and document control

Further advantages

- ✓ Easy document search
- ✓ Logging / recording
- ✓ Traceability

Mehr zu plan-box.com

Specialized in efficient processes and systematic quality assurance in data exchange and management for over 20 years
100% Swiss company based in the canton of Nidwalden
Operation, storage and archiving of all data exclusively in Swiss data centers
